DEPUTY FOR OPERATIONS

A. IDEALIST

1. The IDEALIST program maintained an Operationally Ready status with the capability of accomplishing the assigned mission: "To conduct covert reconnaissance [] over denied and hostile territory, or peripheral reconnaissance on a world-wide basis in support of intelligence objectives of the United States." Two detachments, one at Edwards Air Force Base, California, and one at

25X1

25X1A

[] [] provide a rapid reaction, covert capability to respond to fast developing world-wide contingency situations. With its organizational structure, facilities, and equipment in being and in operation, IDEALIST becomes a national asset with an inherent value in its ability to fulfill national requirements.

25X1D

25X1

This ability was reconfirmed in FY 1971 with the successful completion of [] peripheral missions off the coast of mainland China, a rapid

reaction deployment [] and

25X1

25X1A

a requalification of selected pilots for carrier operations. The program is budgeted at approximately [] and, as such, provides an economical means of meeting certain photographic reconnaissance and

25X1

[] needs in potential crisis environments.

8. Other projects which the IDEALIST resources have supported include:

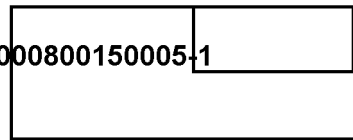

- a. Hurricane Base Line Survey: This was a continuation of the project to provide a photographic base line of the southern United States for future hurricane damage assessment.
- b. Snow Survey: Provided photography for California water resources survey for the Department of Commerce.
- c. RED DOT: Continued to support the Color Task Force with photographic coverage of selected targets in CONUS. This provides comparison of color and black and white photography and assists in determining usefulness of various filters and film emulsions.
- d. Atmospheric Tests: These NRO directed missions were flown in support of photographic testing in New Mexico.
- e. Earthquake Photo: IDEALIST resources provided photographic coverage of the damage caused by the earthquake in Southern California during February 1971.
